

# PolyWorks Software Maintenance

Every new PolyWorks license includes a one-year support and maintenance contract. Why? It guarantees you to obtain the most from your PolyWorks software suite: updates maintain your flexibility and our premier technical support assists you individually!

## Personal support and individual counseling

Our highly trained support team answers your questions via phone, e-mail or online remote connection. It provides you with technical support and helps you in conceptual, technical measurement issues.

In addition, our support plug-in D3D++ is available within PolyWorks|Inspector™. Check your PolyWorks version for updates or start a online remote session online - quickly, safely, easily.

## Update patches for full compatibility and flexibility

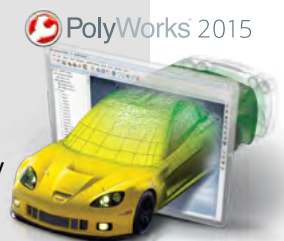

PolyWorks is steadily improving! Update patches ensure you the support of new data import interface definitions as well as new device drivers. Updates of your operating system might require adjustments in PolyWorks. Also, developments of your hardware components can lead to interface problems.

Within your maintenance period you stay flexible through regular software updates. In our regular "maintenance information" we provide you with explanations for all the important changes and developments in each patch..

## Always one step ahead with the latest PolyWorks version

Within your PolyWorks maintenance period you use every new major PolyWorks release free of charge. You remain up-to-date and keep all your options open allowing you to incorporate new measurement instruments or state-of-the-art functionalities in your daily workflow.

## ... *stay* ahead?

If you were satisfied with our service you can renew your software maintenance contract yearly and obtain the most from your PolyWorks software suite: support, updates and new PolyWorks releases. We will automatically send you a quotation before your maintenance expires. For more information, please contact us directly.
